

Job Description

Horizon is recruiting a Fall Arrest & Fall Restraint Safety Lifeline System Installer to form a new team. This role will be Foreman level, therefore experience should include training and competency in installing a variety of Horizontal and Vertical safety Lifeline systems to BSEN 795. The role also includes fitting Handrail, Guardrail Edge Protection, Fixed Access Ladders, Installing Safety Anchors, Eyebolts and Ladder Hooks. The ability to work from drawings and to work to site specific risk assessments and method statements is essential. Candidates should be able to work within a team but also on their own initiative. The Foreman is responsible for the works undertaken by their team on site, carrying out Tool Box Talks, Point of Work Risk Assessments, ensuring Permits are in place, check works upon completion and verify quality/safety of works, take photographic evidence of completed works and complete site documentation or Tablet with installation information. Driver essential, company van provided. Candidates must be able to lodge away as and when required as this is a requirement of the role, contracts are undertaken throughout the UK. Essential competencies include Work at Height & Fall Restraint system installation training, CSCS card is required, IPAF/PASMA certification an asset. Additional training will be provided both in house and by external providers.

Horizon is an Equal Opportunities Employer.

Job Types: Full-time, Temporary, Permanent

COVID-19 considerations:

COVID specific risk assessments are regularly carried out both for office, travelling in company vehicles and while working on site. A COVID Policy is in place and cascaded to all staff. Free issue face masks, gloves and hand sanitiser is available to all.
